Regarding Thomas Lochner

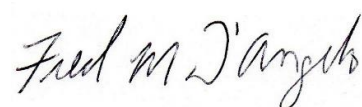

To Whom It May Concern:

I am writing this letter on behalf of Thomas Lochner who took my course, Programming Logic II at Pima Community College. This course, which uses Java, covers advanced topics such as object-oriented programming, collections, inheritance, polymorphism, exception handling and random access files. Throughout this course, Mr. Lochner submitted high-quality work. All of his programs produced correct results and demonstrated an ability to design well-organized programs. His work on random access files was especially interesting in that it used a descriptive, surrogate key to access records in a file. Whenever I made comments for improving his programs, he incorporated them into subsequent assignments.

I believe that you will find that Mr. Lochner will demonstrate a commitment to creating quality products.

If you have any questions, please contact me at [fmdangelo@email.arizona.edu](mailto:fmdangelo@email.arizona.edu).

Sincerely,

A handwritten signature in black ink that reads "Fred M. D'Angelo". The signature is written in a cursive style with a large, stylized 'F' and 'D'.

Fred M. D'Angelo

Former Pima Community College Instructor in Computer Information Systems

Current UA South Instructor in Computer Science and Informatics
